

The COMPUTER FIELD OPPORTUNITY FOR YOU !

Today, the demand for qualified specialists in the field of Computer Programming continues to grow. More jobs are available than are being filled.

This spells opportunity!

- opportunity to satisfy your ambition for greater income!
- opportunity to develop the self-esteem that comes from achieving success in a chosen field!

THE BEST PART OF ALL IS, MOST ANYBODY CAN BECOME A PROGRAMMER!

The computer age, far from putting a premium on a college education, actually has increased job opportunities for the man or woman unable to get to college!

YOU NEEDN'T BE A MATHEMATICAL GENIUS!

Actually, such courses as algebra, trigonometry and geometry are not even needed. A high school diploma or its equivalent, representing a general education, plus the ability to pass a special aptitude test, are the only requirements for starting a career oriented course in this field.

WHAT SORT OF APTITUDE IS NEEDED?

The programmer needs the ability to think logically — plus the specialized training offered by Computer Career Institute in how to translate these logical thoughts into instructions the computer can understand and follow.

COMPUTERS NEED PEOPLE LIKE YOU TO RUN THEM AND TELL THEM WHAT TO DO.

At CCI you can start your training now and defer payment until 9 to 12 months after you graduate. If you are a veteran you will also receive full educational benefits under the GI Bill.

Take the test on the reverse side of this letter and mail your answers to us. We will give you your score and full information about a Computer Career. There is no obligation. Do it today.

TEST INSTRUCTIONS

Each panel above (#1-#8) is a problem in which you are to change figure C to one of the figures on the right side of the test. How is figure C to be changed? Figures A and B give you a hint. Whatever is done to figure A in order to change it to figure B is what must be done to figure C. In other words, you are to find the rule or rules by which A is changed to B. Then use the same rule or rules to find how C should be changed.
